

MINING, BUSINESS AND STOCKS

CENTURY UPON THE TOBOGGAN.

Brokers Had Plenty of Selling Orders for This Park Valley Stock on Hand Today.

DAILY-WEST SOME STRONGER.

Goldfield Bonanza on the Open Board—Mammoth Continues to Hold Up—Forenoon Quotations.

The stock of the Century Gold Mining company was plentiful in the pit of the mining exchange today. There was plenty of it offered for sale, and it was taken up quite readily on declining prices. The fact that the company will take a rest for awhile so far as the payment of dividends is concerned, had the effect of bringing out the "weak kneed." Some believe the stock will sell lower, while others are sanguine that the bottom has been struck, and that the stock is a good investment at present prices.

Some Con. Mercantile changed hands today at 35 cents. Daily-West appeared to be slightly stronger, while Tetra held about even. Goldfield Bonanza came out on the open board at 5 cents a share. For Mammoth 1.45 was bid; the stock was offered at 1.52, but no sales were reported.

The closing quotations and sales were as follows:

AT SUMMIT PLACER.
Shaft is Now in Interesting Ground, Reports Supt. Rigney.

S. L. Butler, manager of the Summit Placer company's oskerite property, near Soldier Summit, where he left for that camp tomorrow morning.

Mr. Butler has received word from Supt. Rigney to the effect that conditions are getting interesting. The shaft is now nearing the 250-foot point, and believes the vein is about to be encountered.

THE WORK AT NEWHOUSE.
Grading on San Pedro Branch from Frisco Has Been Completed.

Supt. of Construction W. C. Thomas of the Newhouse Mines & Smelters corporation, has arrived from Beaver county for a few days' stay at the city offices of that corporation.

Mr. Thomas says the construction of the new mill and other improvements is progressing favorably. Contractor Derich has the foundations for the various buildings well advanced and the frame work for the ore bins at the mouth of the big tunnel is going up.

The grading of the railroad from Frisco has been completed and the track has been laid down to a point near Square Mile, a distance of about 2 1/2 miles out of Frisco. The tracklaying gang is making headway at the rate of about a half mile a day. Trains will be running into camp by the 15th inst.

NOT CORRECTLY STATED.
State Statistician DeMoisy Finds a Discrepancy in Government Report.

State Statistician Charles DeMoisy has received a copy of bulletin No. 9, issued by the department of commerce and labor at Washington, giving figures on the production of the mines of Utah covering the year 1903.

Mr. DeMoisy has compared the figure with those given in his office, as well as those given in the report of the government assayer at Helena, B. H. Tatem, and has reached the conclusion that the department of commerce and labor officials are decidedly in the wrong. The figures given by the latter for the year mentioned places the value of the output from the mines of the state at \$12,378,060, which includes the

product of the coal mines, stone quarries, etc.

In the state statistician's report for the said year the value of the output of the metal mines was placed at \$20,391,000; whereas, Mr. Tatem reported the output of the metal mines alone was \$20,394,000. It will be noted that the figures given by Mr. DeMoisy and Mr. Tatem are not far apart.

While Mr. DeMoisy does not doubt that the report of the department of commerce and labor is correct as far as it goes, he does not believe that department made a complete canvass for the returns. Therefore the mining industry of Utah an injustice.

STRUCTURAL STEEL SHIPPED.

Material to be Used in New Buildings for the Bingham Con.

Word was received from the east today by Contractor J. J. Burke that the structural steel for the new furnace building to be added to the Bingham Consolidated mine at Alta spent yesterday had been shipped from the factory, where it was made. The addition of this furnace to the equipment of the Bingham mine, will enable the treatment of anywhere from 100 to 200 tons of ore additional daily.

It is expected that the new equipment will be ready for commission some time in October.

THE SO. COLUMBUS.

Contractors Have Completed 100 Feet of Tunnel Work.

Manager Alex Jacobson of the South Columbus mine at Alta spent yesterday in camp. The contract let some time ago for 100 feet of tunnel work has been completed. The adit has been driven 440 feet.

The work of driving it further will be done by the company, working three shifts a day.

THE MARSAC MILL.

Old Park City Land Mark Will Soon be A Thing of the Past.

At last the great Marsac mill, one of the old landmarks of the camp, is doomed, says the Park Record, and its destruction will begin Monday morning. The contract for tearing down the large structure was let this week to Joseph Watkins of Wasatch county. Who with a force of men, will commence operations Monday morning. The old mill did great work for many years, and day after day, many after many years, and year after year, the steady pounding of its great stamps was a familiar and joyous sound to the Parkite, for it was the sign of a busy and prosperous camp. It was shut down, however, it has been a menace to the safety of the city, and now that its days of usefulness are over, it is best that it be taken down, under a certain feeling of regret, will exist in the hearts of the old-timers when it is but a memory. The contract let this week is for the woodwork alone and the necessary work on the rollers, and the two large engines, together with the large stack, will be handled by the company. The ground upon which the mill stands will doubtless be cut up and sold for building sites.

THE DAILY-WEST.

What the Park City Record Says About Conditions There.

From perfectly reliable sources it is learned that the condition of the great Daily West should cause no alarm among its stockholders. The lower levels show milling ore enough to keep the mine up for a long time yet, while the first-class ore bodies on the upper levels are no more worked out to the meantime, playing in Boston and other eastern cities, thousands of miles away, who couldn't tell a stone from a stick of giant powder, send out circuits regarding the condition of the property and its future prospects.

Two carloads of huge timbers for the Daily West's new gallowa frame arrived Monday and are being taken up to the mine. The largest of these timbers are 48 feet long and 18 inches square. The new gallowa will be 80 feet high, and it will be necessary to rebuild the hoist about it. The work will in all probability be completed by Sept. 1—Park City Record.

DAILY-JUDGE DEVELOPMENT.

Manager John J. Daly Says Some Good Ore Has Been Struck.

President John J. Daly of the Daily-Judge company was in camp Wednesday and Thursday, and spent the time at his property and also visited the Daily West, says the Park City Record. The gentleman was much pleased with the showing being made at the Judge, and stated that conditions improve wonderfully as the development work progresses. "The farther west we go," said Mr. Daly, "the richer the ore gets, and we are now working through a deposit of the best lead-gold product. The best I have seen in my experience in camp. The outlook is certainly very encouraging, and I have great faith in the mine, as I have in the whole camp, which will I think soon be more prosperous than ever. I am satisfied that there are great deposits of mineral in the camp which have as yet not been found, but I think that some of our prospects are now on the right trail and will have them before long." Mr. Daly, as are many others, is of the opinion that the great body of ore found and being explored in the Alta district are from a continuation of the rich Ontario vein of Park City, and believes that a great mine will yet be uncovered in this stretch of territory lying between the two camps. He is an advocate of deep mining in this camp, and bases his conclusions on 20 years of experience as a miner and mining promoter. He is firmly convinced, from present indications, that the Daily-Judge is destined to be a great producer, and that it will in the near future add a great impetus to the camp's prosperity.

We beg to announce that Mr. Fred Harris has this day severed his connection with this company for which he was formerly sales agent. Rand Drill company, New York, July 20, 1904.

NEW PROCESS FOR SMELTING OF ORE

A Demonstration to be Made at Cleveland, O. With Ore Shipped from a Utah Mine.

MAY REVOLUTIONIZE THINGS.

Owners Claim They Can Treat Low Grade Ores Not Profitable Under Present Methods.

The new Baker process for smelting, the invention of an Ohio man, is to undergo a demonstration with ore from a Utah mine. The ore is now in transit according to the following, which was printed in the Cleveland Plain Dealer of the 2nd inst.:

For the purpose of demonstrating in a practical manner the merits of a new plan for treating and smelting ores, in which he is deeply interested, Charles E. Baker is erecting at Quebec street and Nickel Plate tracks, a small but complete smelter that will cost \$25,000. The plant is already under way and will be in operation this fall. A carload of low grade ore from Utah, that carries gold, silver and lead, has been ordered shipped here and will be the first ore to be treated in the new smelter.

If the new process of handling ores is demonstrated to have the merit claimed for it, there will have been wrought a complete revolution in the process of smelting, and millions of tons of low grade ore, now worthless at the mines in the west, will be highly valuable as the new process will make them easily handled and productive of large profits.

The process is much less expensive than the present methods and contains elements not now employed, these elements making the process effective in handling any kind of ore, no matter what the percentage of metal. It is called the electrolytic method, the active elements being a high current of electricity, combined with the use of chlorine gas, the inventors terming it the Baker process.

The process is the invention of Mr. Baker, the chemical completion of which was worked out by his partner, Mr. Burdette. They have worked some quantities of ore with success and are now preparing to test ore in quantities of one ton or more at a time.

With this they claim to be able to take from the ore silver, lead and zinc separating the metals with nicety and securing from the ore all the various metals completely, and that, too, without losing any portion of their chemicals through the escape of gases.

The process is said to be wholly free from the deposits of sulphur that ruins the smelters now in operation all over the country. They are able to accumulate the sulphur, and store it, thus saving the producer, and making the savings a source of income.

UNCLE SAM DIVIDEND.

Directors at Their Saturday Meeting Declared One for \$5,000.

At the meeting of the directors of the Uncle Sam Consolidated Mining company, held on Saturday afternoon, it was decided to place that Tintic producer back in the dividend column. Accordingly, the shareholders will receive checks aggregating \$5,000, one cent a share, on the 20th inst. The report of Manager Dorn was a most gratifying one. The treasury contains a balance of \$20,000 at the present time. The physical conditions are such that there is every reason to believe the shareholders will receive other dividends before the end of the present year.

DELEGATES HAVE ORGANIZED

Prepared to Win Fight for Mining Congress Location.

The meeting of the delegates to the American Mining congress, at the Commercial club on Saturday evening proved to be an enthusiastic one, and those present entered heartily into the task before them. An organization was perfected. The meeting was presided over by J. S. Brewster, chairman of the Commercial club mining committee, while William H. Tibbals acted as secretary.

A resolution was passed pledging the delegates to do all in their power to have the permanent headquarters of the mining congress located in Salt Lake. It was stated by one that because of the large number of delegates attending the annual sessions of the association, and if the congress is located in this city it will bring nearly \$50,000 to the town yearly. It is desired to have the local membership in the association as large as possible, so as to make a strong bid for the permanent headquarters of the organization. The initiation fee is \$5 and the annual dues are \$2. It is hoped that the Salt Lake branch will have an enrollment of at least 500 members.

The following committee was appointed to solicit members for the association: Frank B. Cook, Thomas Homer, H. S. Joseph, J. S. Bransford and E. S. Darling.

The other committees named were: General Arrangements—Judge O. W. Powers, C. L. Dignowity. Finance—F. B. Cook, G. P. Holman, S. W. Morrison. Advertising and Transportation—John Dorn, Duncan MacVehie, Harry Joseph.

John E. Chipman, James Jennings and John E. Durham were chosen to wait on the officials of the Church of Jesus Christ of Latter-day Saints and request of them the use of the Assembly Hall for the sessions of the Mining congress until the organization can erect a building of its own.

A committee consisting of W. J. Haloran, J. W. Houston and James Chipman was appointed to petition the city council for a site on which to locate the permanent building of the Mining congress. The location that at present appears most favorable is in East Fourth South street, opposite the City and County building.

Delegat Dignowity, who has been over nearly all the mining states of the west during the past few weeks says there will be other cities in the race for the permanent headquarters besides Salt Lake and Denver. The citizens of El Paso are after it and Los Angeles will put up a stiff fight. Mr. Dignowity believes, however, that Salt Lake can win if the proper effort is put forth. This city has a great advantage in its geographical position.

Husler's Flour

A Poor Cook can make good bread—hence its universal popularity.

CONCENTRATES.

Edmund H. Mead has returned from a trip to San Francisco.

Manager C. W. Whitley of the American Smelting & Refining company has returned from a trip to Denver.

Hartwig A. Cohen has purchased a large group of claims in the Funeral range in Nevada for Capt. De Lamar.

W. S. McCormick, of the Silver King and Daily-West companies, departed for San Francisco Saturday afternoon.

Postmaster J. E. Stillwell is down from Alta today on a brief business trip. He says that camp is improving daily.

Financial Manager Lee Hanchett and Chief Metallurgist A. J. Bettles of the Newhouse mines, have returned from a trip to the Cactus mine in Beaver county.

The following are the shipments for the week as reported by Park Record: Crescent lease, 700 and Moore Con., 45,000; K. K., 100,000; Daily-West, 2,647,000; Silver King, 1,637,540; total in pounds, 4,489,540.

Herman W. Horne has returned from a trip to Beaver county, where he surveyed the Independence mining claim near Los Angeles, disclosed the fact that during the month of July, 26,000 barrels of oil was marketed, while on Aug. 1 there were 9,000 barrels on hand.

The management of the Bingham & New Haven Mining company has closed a contract with the local branch of the General Electric company for a large motor to be utilized in driving an air compressor.

A rumor was prevalent on the street to the effect that the Diamond-Minor people, in sinking, had encountered Daily-West workings. Direct telephone inquiry from this office to the mine elicited the statement that the rumor was without foundation. It was also asserted that the reports concerning a contemplated legal controversy between the two companies were without warrant.—Park City Miner.

BOSTON MARKET.

United States	22 1/2	22 3/4

A GALLANT AUTHOR.

The Author's club of Boston devoted last month to a visit to the home of Whittier at Amesbury.

As the club members were passing down Amesbury's main street, a little girl ran forth from a garden where she had been playing and accosted gallantly her friend, Hezekiah Butterworth, the author and editor.

"Mr. Butterworth," she said, as she was taking leave again, "I saw your photograph in a newspaper the other day, and it was so like you that I kissed it."

"Oh, no," laughed the little girl. "Then," said the author, smiling, "it is not like me."

DIALECTS IN CHINA.

Those who suppose that the people of all China use the same language are badly mistaken. There are as many different dialects spoken in the Flowery Kingdom as there are in all Europe.

LOCAL MARKETS.

Eggs continue to rise, in the wholesale market, having risen from \$6.50 to \$6.75 per case in the last week, and a retail may be looked for. This is due to the hens, "ringing" during the heated term. Prices in grain and flour continue unchanged, but a decline is expected, the harvests are being gathered. Green corn is down a peg, and watermelons are cheapening. The prices obtaining in today's local markets are as follows:

RETAIL.	
Corn, per cwt.	1.40
Corn, cracked, per cwt.	1.65
Wheat, per bu.	1.60 1/2
Oats	1.50
Barley, rolled, per cwt.	1.60
Flour, family, per cwt.	2.50
Flour, straight grade, per cwt.	2.40
Flour, high patent, per cwt.	2.80
Bran and shorts	1.20
Straight shorts	1.30

MEATS AND POULTRY.

Dressed beef, lb. 12 1/2 @ 13 1/2
Dressed pork, lb. 12 1/2 @ 13 1/2
Dressed mutton, lb. 10 1/2 @ 11 1/2
Dressed veal, lb. 14 @ 15
Dressed lamb, lb. 15 @ 16
Lamb carcass, 2.50
